IN LUBLIN

Dear Colleagues,

We have a great pleasure to invite everyone interested in different application of isotope techniques to the ESIR Isotope Workshop XV, which will take place on June, 23 - 27, 2019 in Lublin.

The conference is organized by the Mass Spectrometry Laboratory, Institute of Physics, Maria Curie-Skłodowska University together with the Lublin Branch of the Polish Physical Society and ESIR.

ESIR - European Society for Isotope Research - is the association of scientists engaged in isotope research. Isotopic studies of interest to ESIR include various aspects and applications of natural distribution of stable and radioactive isotopes, such as isotopes in geochemical processes, geosciences, oceanography and meteorology, applications of isotopes in industry, mining, forensics, and various other areas, as well as the development of methods and measurement techniques.

PRESENTATIONS

We encourage the submission of oral and poster contributions in the specific scientific areas. All presentation will be published in the Abstract Book. There will be also possibility to publish the full paper (following the regular reviewing procedure) in the *Isotopes in Environmental and Health Studies* journal.

To encourage young scientists and PhD students to present their best contributions, a panel of scientific experts will select the best oral presentations and posters presented to be awarded in the competition for the Best Presentation and Best Poster.

LANGUAGE

The official language of the Isotope Workshop is English.

CONFERENCE TOPICS

General Isotope Geochemistry

Geology and Paleoclimatology

Ecology and Environmental Research

Hydro(geo)logy

Methods and Instrumental Techniques

Inert gas and Radiogenic Isotopes

Isotopes in Biology and Medicine

Other Application of Isotopes
